

Applicable to customers receiving service on the District's Net Metering Schedule.

1. **Customer Name:** _____
Customer Address: _____
2. **MID Electric Service Account Number:** _____, **MID Electric Service Rate Code:** _____
3. **Service Address:** _____
4. **Applicability**

The Net Metering Option is applicable to Customers owning and operating one or more Renewable Electrical Generating Facilities, with a total combined capacity of not more than 3 megawatts ("MW") at the Customer's premises which operates in parallel with the District's transmission and distribution facilities and is intended primarily to offset part or all of the Customer's own electrical requirements. A Customer's total combined generation capacity is the capacity of all Renewable Electrical Generating Facilities, under all of the Customer's accounts.

In addition to this Agreement, the Customer is subject to meeting all additional requirements of the Net Metering 2.0 Schedule and must sign the District's "Electrical Interconnection Agreement For Net Energy Metering from Generation or Storage Facilities of 3 Megawatts or Less" (Interconnection Agreement).

5. Settlement Method

Billing and payments shall be made in accordance with the Net Metering 2.0 Schedule.

The Customer is responsible for all charges due under the otherwise applicable Rate Schedule, including the Fixed Monthly Charge and surcharges and taxes.

1MW of Capacity or less:

For Customers whose total combined Renewable Electrical Generating Facilities' generation capacity across all customer accounts does not exceed one megawatt, the District will, on a monthly basis, compensate the Customer's account for energy that is received by the District from the Customer, as measured by the District-installed metering equipment, at the Credit Rate as set forth in the Net Metering 2.0 Schedule. The District shall not provide compensation for any energy that it receives from a Customer with a Grid-Charged Battery Energy Storage System. The District shall retain the Renewable Energy Credits associated with the energy received by the District from the Customer.

Greater than 1MW of Capacity:

For Customers whose total combined Renewable Electrical Generating Facilities' generation capacity across all customer accounts exceeds one megawatt, the monthly Capacity Charge set forth in the Net Metering 2.0 Schedule under "Monthly Charges, Item 3", shall apply to the installed kW above one megawatt. The District will not compensate the Customer's account for energy that is received by the District from the Customer at the Credit Rate as published in the Net Metering 2.0 Schedule or otherwise. The Customer shall retain the Renewable Energy Credits associated with the energy received by the District from the Customer.

6. Effective Date, Modification, and Termination

This Agreement shall be in effect when signed by the Customer and the District, and shall remain in effect thereafter until the earlier of the following: (1) the Interconnection Agreement between the District and the Customer is terminated, or (2) the end of the Service Term under the Interconnection Agreement.

In addition to termination of the Interconnection Agreement and the end of the Service Term under the Electrical Interconnection Agreement, this Agreement may be terminated by either party providing thirty (30) days prior written notice to the other Party.

7. Rates and Electric Service Rules

This Agreement will at all times be subject to the District's Rates, Schedules and Electric Service Rules, as each is amended from time to time. Any changes to the District's Rates, Schedules and/or Electric Service Rules that would act to modify this Agreement shall automatically be incorporated herein without need for a formal amendment.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives.

This Agreement is effective as of the last date set forth below.
