

Modesto Irrigation District's MPower Home Rebate Program offers residential customers incentives for the purchase and installation of qualifying energy efficient products installed in existing homes. Minimum qualifications must be met. General program restrictions are listed below. Refer to MID Rebate Catalog for product specific requirements and limitations.

- Purchase (not lease) and install qualifying product(s) between November 1, 2011 and December 15, 2012. These dates may change if funds are depleted sooner. Qualifying products must be installed before submitting your application. The application and supporting materials should be returned within 90 days of purchase date. All applications must be postmarked by December 15, 2012 to be considered eligible.
- For all qualifying measures, the product purchase date is determined by proof of purchase documents, such as the customer acceptance date of a home improvement contract or the printed date on the store cash register receipt or itemized invoices. Invoices must indicate payment has been received in full. All documentation must be legible. Upon MID notification, if required documentation is not received within 30 days, the rebate will be voided.
- All product installations that receive a rebate are subject to MID inspection.
- MID reserves the right to request specific manufacturer specifications and/or data for any product.
- In no case will MID pay more than 100% of the actual purchase price for the product(s) that qualify for a rebate, and purchase price is net of taxes and shipping. Proof of purchase document(s) must include price per product and payment terms or "type of transaction" (i.e. cash, credit, etc.). Leased and/or performance based projects don't qualify.
- These rebates don't apply to new home construction (see New Home Construction program). However, for newly constructed homes, qualifying measures purchased and installed after the certificate of occupancy has been issued by the city or county are eligible for rebate under this program. Furthermore, qualifying measures installed in additions to existing homes are eligible for this program provided that the addition does not exceed 20% of the pre-existing floor area.
- MID is not responsible for any taxes that may be imposed as a result of these rebates.
- Rebates of \$600 or less are issued as credit(s) on the electric account for customers. Rebates greater than \$600 are issued by check for customers. Check rebates are eligible only to customers in good financial standing with MID (subject to MID approval).
- Property owners or authorized payees - Rebates of \$100 or less are issued as credit(s) on the active electric account. Rebates over \$100 are issued by check. IRS W-9 Form is required for rebate totals of \$600 or more.
- Products can only receive one MPower Home rebate from MID during its useful life period, see rebate specifications. Reapplication for rebate will not be accepted during this period.
- Owners of rental units should submit a separate rebate application for each service address.
- Funds received from sources other than MID rebate programs that lower the cost of the project may affect the incentive amount applicants receive. These sources include all third-party energy efficiency programs offering direct funding, financing or rebates (other than tax credits). The funded amount(s) will be deducted from the actual and documented project cost as it relates to the MID criteria and the maximum accrued rebate will not exceed net project costs. Applicants are required to inform MID of any other incentives for which they have applied and/or may receive.
- MID reserves the right, without prior notice, to periodically review and make changes to rebate qualification standards and to determine final program eligibility. See www.mid.org/rebates for current information and forms.
- MID makes no representation or warranty and assumes no liability with respect to quality, safety, performance or other aspect of design, system or appliance installed pursuant to this agreement and expressly disclaims any such representation, warranty or liability.

Remember to include:

- A completed application, including contractor information and signature.
- A photocopy of the original detailed itemized and dated invoice, contract, home improvement contract or cash register receipt for the product or work, including detailed payment terms. Documentation varies by rebate item. See current MID Rebate Catalog for details.

Send completed application and supporting materials to:

Send to: MID Energy Services Dept., P.O. Box 4060, Modesto, CA 95352-4060

MID Solar Photovoltaic (PV) Rebate Program

The MID Solar Photovoltaic (PV) Rebate Program offers an exciting opportunity for electric customers to take their homes one step beyond conventional energy efficiency – and get cash back from MID.

Solar PV systems may also be eligible for a federal tax credit. *(Subject to change - check with the U.S. Internal Revenue Service)*

For information on the Solar PV Rebate program:
 Contact the Energy Services Department at (209) 526-7339 or by email at pv@mid.org
