

Applicability

This Schedule is applicable to separately metered water well pumping, reclamation service, and farm use. Lighting and farm use will be provided to the extent permitted in Special Provision 2. This Schedule shall not apply to commercial food or agricultural processing operations, machine shops, or any other service not connected with the individual farm operation.

Character of Service

Alternating current at a frequency of approximately 60 Hertz: 120 volts, 120/208 volts or 120/240 volts, single phase or 240 volts, 240/120 volts, 208Y/120 volts, 480Y/277 volts, 480 volts, 4,160 volts, 12,000 volts, 17,200 volts three phase, where and to the extent available, at the option of the District.

Monthly Charges

The total amount of a customer's bill, excluding applicable local and state taxes and surcharges, will be the sum of the charges listed below and any adjustments for Special Provisions, effective on the date of meter reading for each account.

Summer (May – September)	Winter (October – April)
Fixed Monthly \$8.00	Fixed Monthly \$8.00
Fixed Horsepower (per HP):	Fixed Horsepower (per HP):
Less than 10 HP \$0.40	Less than 10 HP \$0.40
10 HP & Over \$0.80	10 HP & Over \$0.80
Electric Usage (per kWh):	Electric Usage (per kWh):
First 5,000 kWh \$0.1418	First 5,000 kWh \$0.1257
Over 5,000 kWh \$0.1286	Over 5,000 kWh \$0.1146

Territory Served

The entire area within the Modesto Irrigation District electric service boundary or any other area served by Modesto Irrigation District pursuant to the laws of the State of California and the District's Electric Service Rules.

Connected Load

The connected load used to determine the horsepower-based fixed charges shown under Monthly Charges shall be the total actual horsepower rating of all motors or other devices which are capable of being connected simultaneously to the District's system.

In lieu of the connected load, the District may, at its option, measure by meter the maximum 15-minute demand in kilowatts. Such maximum demand divided by .746 shall then be used as the connected load in horsepower.

Term (Three-Phase Service)

Thirty-six (36) continuous months and thereafter until canceled on 30 days prior written notice to the District. Service to such facilities hereunder shall be continuous and temporary disconnection shall not be made.

Upon termination of service, the District shall have the right to remove all of its facilities placed, installed, erected or used in supplying service hereunder.

If service is canceled prior to the expiration of the initial 36-month period, the customer shall pay the District the monthly fixed charges for the remaining portion of the period.

Special Provisions

1. Separate Metering

Service under this Schedule will be supplied through a single meter and readings thereof will not be combined for billing purposes with those of any other meter through which other service may be taken by the customer.

2. Incidental Loads

Incidental lighting not to exceed 10% of the connected load will be permitted under this Schedule for water well pumping provided that the total connected load is 50 horsepower or more. Incidental lighting and power for general farm use is permitted under this Schedule for poultry house lighting and other agricultural uses. Residential uses such as cooking, water heating, lighting, heating, cooling or other uses are not allowed.

All energy taken for such lighting or agricultural uses shall be taken through the power meter at the same voltage and shall be satisfactorily balanced between the phases.

3. Electric Service Rules

Service under this Schedule is subject to the District's Electric Service Rules as they may be amended from time to time.
