

A close-up photograph of a hand holding a white LED light bulb. The bulb is held between the thumb and index finger, with the rest of the hand visible in the background. The background is a soft, out-of-focus green.

Rebate Catalog

Save money on qualified Lighting,
Refrigeration, Appliances and more.

Modesto Irrigation District (MID) offers rebates on many energy-efficient products and improvement for your business. When you purchase and install these products, you can save energy and money while reducing your impact on the environment. Learn more at mid.org/rebates/business

How to apply

1. Read the Terms and Conditions at mid.org/rebates to determine if you are eligible for a rebate.
2. Locate the item(s) that you are applying for in this catalog. Be sure to review the important qualification information.
3. Contact MID to schedule a pre-inspection if required.
4. Request MID pre-authorization if rebate is anticipated to exceed \$3,000.
5. Purchase and install the qualifying product(s) in your business between November 1st the prior year and December 15th of the current year, unless otherwise noted.
6. Complete, sign and submit your application. All applications must be received within 90 days from date of purchase, but no later than December 15, 2019.

Please send completed forms and required documentation with proof of purchase to:

MID Energy Services
PO BOX 4060
Modesto, CA 95352

More ways to save

Visit mid.org for energy conservation tips and ideas in addition to rebates, MID offers a wide range of ways to save energy, money and help the environment.

Visit your online profile to view in depth information regarding your account to start on the path to an energy efficient business.

Refrigeration Requirements

Please read the details below to ensure you are installing a qualifying product(s).

Vending Machine Controller

REQUIREMENTS

- Intended for refrigerated vending machines containing only non-perishable bottled or canned beverages.
- Controller must include a passive infrared occupancy sensor to turn off display lights and compressor when surrounding area is unoccupied for 15 minutes or longer.
- Control logic should periodically power up machine at 2-hour intervals to maintain product temperature and provide compressor protection.
- Refurbished vending machines that include this option are eligible.

REBATE PER CONTROLLER

REBATE ID CR006

USEFUL LIFE PERIOD: 5 years

Plastic Swinging Doors

REQUIREMENTS

- New plastic swinging doors must be installed on doorways of refrigerated spaces (conditioned to less than 50° F).

\$6

REBATE PER SQ. FT.

REBATE ID CR022

USEFUL LIFE PERIOD: 4 years

Night Covers for Vertical and Horizontal Cases

REQUIREMENTS

- Must install a cover on an otherwise open display case to decrease cooling load of the refrigerated case during off hours.
- These film-type covers should have small, perforated holes to decrease moisture buildup.
- Case manufacturer must not object to the use of this measure.
- The cover must be applied for a period of at least six hours per day.

ENERGY STAR®

Commercial Ice Machines

REQUIREMENTS

- Ice machines must be tested in accordance with the Air-Conditioning, Heating, and Refrigeration Institute (AHRI) Standard 810. Visit <http://www.ahrinet.org> for product information and testing procedures.
- Specifications are available at www.energystar.gov/cfs and www.cce1.org.
- A list of qualifying units can be found at www.cce1.org.
- Includes machines generating ice cubes that are 60 grams (2 oz.) or lighter. It also includes flaked, crushed and fragmented ice makers.
- Only air-cooled machines qualify (self contained, ice making heads, or remote condensing).
- The entire AHRI tested ice making system must be purchased. Remote machines must be purchased with qualifying remote condenser or remote condenser/compressor unit.

Appliance Requirements

Please read the details below to ensure you are installing a qualifying product(s).

ENERGY STAR® Room Air Conditioner

REQUIREMENTS

- Must be ENERGY STAR® qualified.

LIMITATIONS

- Limit 2 ENERGY STAR® qualified Room Air Conditioner rebate per business within an 9 year period.

\$50

REBATE PER UNIT

REBATE ID CAP001

USEFUL LIFE PERIOD: 9 years

Electric Tank Storage Water Heater

REQUIREMENTS

- Capacity must be 40 gallons or more.
- Must have an Energy Factor (EF) of 0.96 or greater.

EXCLUSIONS

- Only residential-style electric storage water heaters qualify.
Go to www.ahridirectory.org for a list of qualifying water heaters.
- Instantaneous/tankless water heaters do not qualify.

\$75

REBATE PER UNIT

REBATE ID CAP002

USEFUL LIFE PERIOD: 15 years

ENERGY STAR® Heat Pump Storage Water Heater

REQUIREMENTS

- Must qualify as an Energy Star® heat pump water heater - see <https://www.energystar.gov/productfinder/product/certified-water-heaters/> for a list of qualified heat pump water heaters.
- Must replace electric tank storage water heater.
- Must have a Uniform Energy Factor (UEF) of 2.2 or greater.
- Must have a capacity greater than 40 gallons.
- Must be installed outside the air-conditioned working space.

LIMITATIONS

- Limit 1 ENERGY STAR® qualified Heat Pump Water heater rebate per MID account within a 10 year period.

\$500

REBATE PER UNIT

REBATE ID CAP003

USEFUL LIFE PERIOD: 10 years

Lighting Requirements

Please read the details below to ensure you are installing a qualifying product(s).

Lighting Limitations

- An MID inspection of the pre-existing lighting scheme is required prior to the installation of new equipment. Written lighting proposal (including detailed changes in lighting levels) may be required prior to MID inspection. Call (209) 526-7339 to arrange for an inspection.
- All lighting equipment must be new. Used or rebuilt equipment is not eligible for rebates.
- Rebates are offered for initial conversion/ installations only (i.e., customers may not apply for rebates to replace burned out lamps, fixtures or ballasts for which they received past MID rebates).
- MID reserves the sole right to make determination of program eligibility and compliance.
- Brand name and model numbers must be included on invoice.
- Rebates intended for one-to-one replacements while maintaining equivalent lighting levels.
- Must meet current CA Title 24 standards

Lamps

ENERGY STAR® LED Lamps Screw-In, Recessed & Pin base lighting

REQUIREMENTS

- Comply with current ENERGY STAR® Eligibility Criteria; and provide clear and consistent labeling of ENERGY STAR® qualified integral LED lamps.
- Lamps must be listed at: www.energystar.gov to qualify.
- Only downlighting applications are eligible for rebates.
- Must replace incandescent or fluorescent, PAR, R and/or reflector flood lamps.
- Must have an integrated LED driver and an ANSI standardized base.
- Interior applications only.
- Must provide +/- 10% of existing lumen output.

\$4

REBATE PER LAMP

New Exterior LED Security Lighting

New Exterior LED Security Lighting

REQUIREMENTS

- MID must conduct a pre-inspection and approve all proposed installations before the commencement of any work.
- Fixtures must be Design Lights Consortium (DLC) listed ("DLC qualified" should be notated on packaging or manufacture product sheets or can be verified at www.designlights.org).
- Fixtures must be listed and within the wattage ranges provided for rebate.
- Fixtures must be installed as new installations, not replacing any other light source, mounted on the exterior of a structure or on a pole.
- Fixtures must be controlled by either a photo cell or time clock (fixtures controlled by motion sensors do not qualify).
- Fixtures must be new (not used or refurbished) qualified LED Outdoor Full Cutoff Wall Mounted Area Luminaires, LED Outdoor Non/Semi Cutoff Wall Mounted Area Luminaires, LED Parking Garage Luminaires, LED Outdoor Security Flood or Spot Luminaires, or LED Outdoor Pole/ Arm Security Luminaires.
- Fixtures must operate on average a minimum of 8 hours per night and/or 2900 hours per year.

Pre-inspection required.

Signage

Channel Signs (LED)

REQUIREMENTS

- Must replace incandescent-lighted or neon-lighted channel letter signs.
- LED retrofit kits or complete LED replacement signs are eligible.
- Replacement signs cannot use more than 20% of the actual input power of the sign that is replaced.
- Measure the length of the sign as follows:
 1. Measure the length of each individual letter at the centerline. Do not measure the distance between letters.
 2. Add up the measurements of each individual letter to get the length of the entire sign being replaced.

- Rebate applies to passive infrared and/or ultrasonic detectors only.
- Plug-load sensors must control electricity-using equipment in offices or cubicles, including shared copiers and/or printers.

\$11.25

REBATE PER SENSOR

REBATE ID CL056

USEFUL LIFE PERIOD: 10 years

HVAC & Air Conditioning Requirements

Please read the details below to ensure you are installing a qualifying product(s).

Commercial Air Conditioning Limitations

- Rebate amounts will be calculated based on unit cooling capacity to the nearest 6,000 Btu/h.
- Eligible units must meet all the minimum efficiency performance criteria applicable for each equipment category.
- A California licensed contractor with a C-20 license must perform installation. An exception to this requirement may be made in cases where a customer has their own qualified employee(s), as designated by appropriate job title, install qualifying air conditioning at their business location.
- Contractor must complete and sign the Information and Certification portion of the rebate application.
- Brand name and model numbers must be included on invoice.
- For Split or Packaged Unitary Systems < 65,000 Btu/h (single phase), units must be listed (Active status) on the CEE Directory of Efficient Equipment (www.ceedirectory.org). All other units must be listed (Active status) on the AHRI Directory of Certified Product Performance (www.ahridirectory.org). CEE = Consortium for Energy Efficiency;
- AHRI = Air Conditioning, Heating and Refrigeration Institute.
- Attach the current AHRI Certificate of Product Ratings.
- For rooftop installations, customer must provide code-compliant access for MID inspection.
- Rebate given for replacing an existing air conditioner or adding a new unit.

Package Terminal AC & Heat Pump (<24,000 Btu/h)

Unit Capacity	EER – PTAC	EER – PTHP
< 7,000 Btu/h	11.29	11.17
7,000 to 15,000 Btu/h	10.27	10.15
> 15,000 Btu/h	9.29	9.13

\$75

REBATE ID CH001

USEFUL LIFE PERIOD: 15 years

Ductless Mini-Split AC & Heat Pumps (<65,000 Btu/h)

Ductless mini-split air conditioning systems (a.k.a. ductless heating and cooling systems) are highly efficient products that deliver warm or cool air directly into different zones in the building, instead of routing it through ducts first. They are a cost-effective solution to replace inefficient baseboard electric heating and window air conditioners.

- Minimum efficiency 16.0 SEER; 8.5 HSPF.
- Unit equals inside head.
- System cooling capacity cannot exceed 5 tons.

\$250

USEFUL LIFE PERIOD: 15 years

Energy Star® Smart Thermostat

REQUIREMENTS

- Thermostats must qualify as an Energy Star® Smart Thermostat. See https://www.energystar.gov/products/heating/smart_thermostats for a list of qualified thermostats.
- Smart thermostat must be new and replace existing manual or programmable thermostat on a central heating and cooling system.

LIMITATIONS

- Limit 6 thermostat rebate per business.

\$50

REBATE PER UNIT
for central AC/
Heat Pump - electric heating

REBATE ID CH024

USEFUL LIFE PERIOD: 11 years

Unitary Split-System & Single-Package AC & Heat Pump (<65,000 Btu/h)

A Unitary Air Conditioner is one or more factory made assemblies ordinarily including evaporator coil(s), compressor(s), and condenser(s). An Air-Source Unitary Heat Pump ordinarily includes these same components plus a reverse mode for heating. When these components are integrated into one cabinet, they are single packaged units; when provided in separate assemblies and designed to be used together, they are split systems.

- AC units must meet SEER and EER; Heat Pumps must meet SEER, EER and HSPF.
- Single phase, split systems < 65,000 Btu/h using water/evaporative cooled condensers may be eligible provided that the a/c system has a current AHRI Certificate of Product Ratings. MID will determine qualification for rebate.

Equipment Type	Efficiency Level	Configuration	SEER	EER	HSPF (Heat Pump)
Air Cooled	CEE Tier 1	Split	15.0	12.5	8.5
		Packaged	15.0	12.0	8.2
	CEE Tier 2	Split	16.0	13.0	9.0

Unitary Split-System & Single-Package AC & Heat Pump (65,000 Btu/h & <760,000 Btu/h)

These units are factory-made Commercial and Industrial Unitary Air-Conditioning and Heat Pump Equipment, as defined by AHRI Standard 340/360. This standard applies only to electrically operated, vapor compression refrigeration systems.

- For units with cooling capacity of 20 tons or more, contact MID Energy Services at (209) 526-7339 prior to installation.
- AC units must meet EER and IEER; Heat Pumps must meet EER, IEER and COP.

Minimum required efficiency: CEE Tier 1		AC		Heat Pump (HP)		
Equipment Type	Unit Capacity	EER	IEER	EER	IEER	COP
Air Cooled	65,000 – 134,999 Btu/h	12.2	14.0	11.8	13.6	3.4

Window Sun Shading Requirements

Please read the details below to ensure you are installing a qualifying product(s).

Window Film, Sun Screen and Awnings REQUIREMENTS

- Must be installed according to the manufacturer's instruction on south, east or west facing windows (any direction except 45 degrees of true north). Qualification of marginal orientations and / or circumstances is subject to the sole discretion of MID.
- Number of windows and square feet installed must be included on invoice.
- Must have a minimum five-year manufacturer's warranty.
- Must be installed in space conditioned by refrigerated air conditioning (central, window or wall unit).
- Awning must be at least as wide as the window aperture.

HOW TO DETERMINE SOLAR HEAT GAIN COEFFICIENT

Multiply the shading coefficient (SC) by 0.87 to determine the solar heat gain coefficient (SHGC).
 $SC \times 0.87 = SHGC$

WINDOW FILM: Must have a SHGC of .39 or less and cover the entire window aperture. Applied to the glass only. Doesn't cover an opening.

SUN SCREENS: Must have a SHGC of .35 or less and cover the entire window aperture.

AWNING: Must be at least as wide as the window aperture.

USEFUL LIFE PERIOD: 10 years

EXCLUSIONS

- Interior window treatments (curtains, blinds and shutters) are not eligible for Sun Screen rebate.
- Windows must not be shaded by existing awnings, exterior curtains or blinds or any other shading device.

OTHER INFORMATION

- Rebate based on square footage of qualifying window.

Pool Filtration Pump Requirements

Please read the details below to ensure you are installing a qualifying product(s).

ENERGY STAR® Qualified Variable-Speed Pool Pump & Motor

REQUIREMENTS

- All manufacturer installation requirements must be followed. Permit required if electrical upgrades required.
- See www.energystar.gov for a list of qualified units. Only variable-speed units are eligible for rebate.
- Equipment and materials must meet or exceed all applicable local, state and federal standards.
- Must be installed on new or existing in-ground swimming pools for primary filtration only.
- Replacement units must be of equal or lesser horsepower that existing single or two speed pump & motor (retrofit only).

Pre-inspection is required.

\$400

REBATE PER UNIT

REBATE ID CP101

USEFUL LIFE PERIOD: 10 years

EXCLUSIONS

- Cannot exceed 10 horsepower.
- Above-ground pool, pond, pool cleaner booster, spa and water feature pumps and rewinding of motors do not qualify.

LIMITATIONS

- Maximum of 4 Energy Star® Qualified Variable-Speed Pool Pump & Motor within a 10 year period.

Include a copy of itemized and dated receipt, contract or invoice marked paid in full for all products. Rebates available on a first come - first served basis, subject to availability of funds. Submit application within 90 days of purchase, but no later than December 15, 2019.

Notes:

Modesto Irrigation District's MPower Business Rebate Program offers commercial, industrial and agricultural customers rebates for the purchase and installation of qualifying energy efficient products in existing facilities.

REBATE REMINDERS

1. Refer to the MPower Business Rebate Catalog for qualifying items and how to apply.
2. Get MID pre-authorization if rebate is anticipated to exceed \$3,000.
3. Read the Terms and Conditions for rebates below.
4. Submit complete rebate application package to:
MID Energy Services
PO Box 4060
Modesto, CA 95352

Terms and Conditions

Availability

- Rebates are offered from January 1, 2019 through December 15, 2019 on a first come – first served basis, subject to availability of funds. MID rebate funding is not guaranteed until the application has been approved.
- Rebates are available only for products that not required by or are in excess of CA Title 24 requirements, when applicable. MID may request Title 24 compliance documentation before approving any rebate.
- Rebates anticipated to exceed \$3,000 and all exceptions require pre-authorization of the MID Energy Services Department. Rebates issued at the sole discretion of MID.
- Products can only receive one rebate from MID during its useful life period. Reapplication for rebate will not be accepted during this period.

Eligibility

- Rebates are provided for qualifying product(s) installed in a business location receiving electricity from MID to customers in good financial standing with MID (subject to MID approval).
- Qualifying products must be installed before submitting your application. It is the responsibility of the contractor and customer to ensure installation is done in accordance with all applicable city, state and national standards, codes and ordinances as enforced by the local compliance authority.
- The application and supporting materials should be legible, submitted to MID within 90 days of purchase date and postmarked by December 15, 2019. Exception: Applications for rebate items that are discontinued mid-year must be received by the end date noted in the program document.
- These rebates do not apply to new construction, additions to existing facilities, or reconstruction of existing facilities (i.e.: gut and rehab, change of occupancy) that must comply with CA Title 24 Energy Standards. See MID web site for information about rebates for non-residential new construction.

Processing

- Only complete applications will be processed

for rebates. Complete applications include signature, proof(s) of purchase and required documentation for all products referenced in the application.

- For incomplete application, MID will notify customer of missing documentation. If the required documentation is not received by MID within 30 days, the application will be voided.
- Rebates take from six to eight weeks to process.

Purchase

- Purchase (not lease) qualifying products(s) new at retail price and install them between November 1, 2018 and December 15, 2019. These dates may change if funds are depleted sooner.
- For all qualifying measures, the product purchase date is determined by proof of purchase documents, such as the customer acceptance date of a contract for services, a detailed itemized and dated paid invoice, contract or the printed date on a store cash register receipt. Proof of purchase document(s) must include price per product and detailed payment terms or "type of transaction" (i.e., cash, credit, etc.).
- Leases and/or performance based projects and previously owned equipment do not qualify for MID rebates.

Inspection

Pre-Inspection may be required. See each measure for details.

- Customer must disclose to MID, at the time of the rebate pre-inspection (if required for rebate item), exactly what energy efficiency modifications are planned and where on the premises they will be installed. Projects that significantly differ in application, scope of install location from MID's information may not be eligible for rebate.
- All products are subject to a post-installation inspection by MID.
- MID reserves the right to request manufacturer specifications and/or data for any product.

Payment

- Rebates of \$600 or less are issued as credits on the business electric account. Rebates

greater than \$600 are issued by check.

- IRS W-9 form is required for rebates issued by check. IRS W-9 form must be current version. MID is not responsible for any taxes that may be imposed as a result of these rebates.
- Rebate payments are limited to 100% of eligible costs of qualifying products (excludes installation, taxes, shipping, handling and warranty costs and minus any funds received from other sources).
- Funds received from sources other than MID rebate programs that lower the cost of the project may reduce the incentive amount applicants receive from MID. These sources include all third-party energy efficiency programs offering direct funding, financing or rebates (other than tax credits). The funded amount(s) will be deducted from the actual and documented Project Cost when calculating eligible project cost. Applicants are required to inform MID of any other incentives for which they have applied and/or may receive.

General

- MID reserves the right, without prior notice, to periodically review and make changes to rebate Qualification standards and to determine final program eligibility.
- MID makes no representation or warranty and assumes no liability with respect to quality, safety, performance or other aspect of design, system or appliance installed pursuant to this agreement and expressly disclaims any such representation, warranty or liability.

Annual Application Cap

- The annual application cap for this program is determined per account, by the applicable MID electric rate schedule:
 - \$10,000 (GS-1, FL, SL)
 - \$20,000 (P-3, GS-2 up to 499 kW)
 - \$30,000 (GS-2 500-1000 kW, GS-TOU)
 - \$50,000 (P-4, GS-3)
 - \$75,000 (IC-25)
- Applications for rebates above these amounts will not be accepted unless preauthorized by MID.
